Learn the platform. Introduce new members. Grow recurring referrals.

INSIDE THE HANDBOOK

Simple explanations • User onboarding • Commission examples

20% RECURRING REFERRALS

On qualifying paid subscriptions and eligible renewals

START HERE

Welcome to the TitanArb team

This handbook gives community managers a simple way to explain TitanArb, welcome new people and earn referral rewards.

Your job in one sentence

Help interested people understand the platform, join through the official process and find the information they need to become informed subscribers.

The four things every community manager does

- **Explain: Describe TitanArb using everyday words, not complicated trading language.**
- **Guide: Send people to titanarb.com, the waitlist or sign-up process, and the official dashboard.**
- **Follow up: Answer questions, share useful materials and connect customers to official support.**
- **Track: Use your referral link and dashboard to follow eligible sign-ups and commission records.**

Your main message

TitanArb uses technology to look for price differences across supported decentralized sports markets. It attempts qualifying trades automatically and shows account holders their capital and trading activity in a personal dashboard.

EXPLAIN IT SIMPLY

What exactly is TitanArb?

TitanArb is an automated sports arbitrage platform. It is not a traditional bookmaker, and users do not need to guess match winners themselves.

What does “arbitrage” mean?

Sometimes, two markets list different prices for opposite outcomes of the same event. If the combined cost is low enough, the difference can create an opportunity. TitanArb searches for those price gaps and checks whether a trade can be made.

A very simple example

Market A offers one side of an event for 48 cents. Market B offers the opposite side for 49 cents. Together they cost 97 cents. If both positions truly cover every possible result and settle at a combined value of $1, the price gap is 3 cents before fees. This is only a learning example, not a live trade or guaranteed result.

One-minute explanation for a new user

What to say

“TitanArb looks for differences in the prices of sports events across decentralized markets. Its system checks the available prices and tries to place the matching trades automatically. You subscribe to a plan, deposit your trading funds into your TitanArb account and follow your results on your dashboard.”

PLATFORM BASICS

How TitanArb works

Think of TitanArb as a system that looks, checks, acts and records what happened.

01 SCAN

TitanArb looks across supported decentralized sports prediction markets for relevant price differences.

02 FIND

When a possible opportunity appears, the system identifies the prices and positions involved.

03 CHECK

The system checks liquidity, fees, price movement and whether the trade setup fits the execution rules.

04 EXECUTE

If the opportunity qualifies, the platform attempts the required trades through its trading infrastructure.

05 SETTLE & RECORD

The platform follows the completed positions, records costs and reconciles the final result in the account records.

Important product distinction

TitanArb focuses on decentralized prediction-market infrastructure. Examples in its market roadmap include Polymarket, Dexsport, Azuro and Thales. Available integrations can vary by market, event, liquidity and location.

KNOW THE PRODUCT

How customer funds work

TitanArb is custodial. This is an important point for every community manager to explain correctly.

01 The user creates an account

After account access is granted, the customer chooses a plan and follows the official deposit steps.

02 Funds are deposited to TitanArb

Trading funds enter the platform-controlled account system. These are not simply left in a user-held trading wallet.

03 The platform manages trading allocations

The system uses eligible available capital for trading activity according to the plan and account settings.

04 The dashboard records balances and results

Users can view available capital, capital currently in use and realized results as they are recorded.

05 The user requests a withdrawal

Withdrawals are requested through the official account process and processed under TitanArb's applicable terms.

A clear way to explain custody

Customers deposit trading capital into TitanArb, and the platform manages that capital for eligible trades. Subscribers view their account balances, activity and withdrawals in the dashboard.

PLATFORM FEATURES

What subscribers can see

Community managers should be comfortable showing users these parts of the platform.

AREA	WHAT IT MEANS
Account Overview	Subscription, balances and account activity in one place.
Automated Trading	Market monitoring and attempts to execute qualified arbitrage setups.
Available Capital	Funds that are not currently allocated to a trade.
Capital in Use	Funds assigned to an active trade or settlement process.
Live Execution Feed	A broader view of TitanArb platform activity.
Referral Dashboard	Unique referral link, eligible referrals and commission history.

How to explain the Live Execution Feed

The feed shows a trade's journey: Detected → Evaluated → Executed → Settled, or Aborted if the process stops. It helps users understand what the platform is doing.

MEMBERSHIP KNOWLEDGE

The five subscription plans

TitanArb's monthly fee is separate from the trading capital deposited into the platform.

PLAN	MONTHLY FEE	TRADING CAPITAL
Starter	$10	$10 - $99
Basic	$25	$100 - $499
Standard	$50	$500 - $1,999
Pro	$100	$2,000 - $4,999
Premium	$200	$5,000 - $10,000

Explain the difference

If someone chooses Basic, the subscription costs $25 per month. The customer can make $100-$499 available as eligible trading capital. The $25 is the access fee; it is not the same as the trading deposit.

How to help someone choose

- Ask what amount they are comfortable allocating to trading.
- Match that amount to the published plan range.
- Explain the monthly fee and the trading deposit separately.
- Show where plan details and account limits appear on the official website.

INTRODUCTORY BENEFITS

Free trial and Subscription Protection

Two membership benefits new users frequently ask about.

Three-day free trial

Eligible new users can explore TitanArb for three days without paying a subscription fee. The trial helps them see the dashboard, understand the platform and become familiar with how automated arbitrage works.

What is Subscription Protection?

Under TitanArb's published introductory policy, if an eligible subscriber's qualifying realized net trading profit during the first 30 days does not cover the applicable subscription fee, the following month's subscription is provided without an additional subscription charge, subject to program terms.

Simple example

A user pays $50 for the Standard plan. If qualifying realized net trading profit in the first 30 days is $35 and the customer meets the program's conditions, the next subscription month is provided at no extra subscription charge. This benefit applies to the subscription fee, not the customer's trading capital.

What managers explain

- **The free trial lasts three days for eligible new users.**
- **Subscription Protection concerns the next subscription fee when its conditions are met.**
- **The website terms determine eligibility, qualifying results and how a complimentary month is applied.**

MANAGER BENEFITS

How recurring referrals pay

TitanArb's referral program rewards introductions that lead to qualifying paid subscriptions.

Your referral commission
20% of every qualifying subscription payment made by a directly referred customer, including eligible renewal payments while that customer remains active and the program terms continue to apply.

What makes a referral count?

- The new user joins through your unique referral link or an approved attribution process.
- The user completes a qualifying subscription payment.
- Eligible later renewals by that same direct referral can generate another commission.
- A free trial or a complimentary $0 subscription month does not create a 20% commission on a payment that was not made.

What the referral program is not

There is no multi-level downline in this program. Commissions are based on eligible subscription payments by people you directly refer, not on the size of their deposits, their trading profits or people recruited by other people.

Benefits of being a community manager

- Recurring rewards: eligible renewals can continue paying commissions without a second referral.
- One direct link: your unique link connects referred subscribers to your account.
- Clear tracking: monitor referral activity and commission records in the dashboard.

REFERRAL MATHEMATICS

Your commission by plan

The formula is simple: qualifying subscription payment × 20% = referral commission.

SUBSCRIBER PLAN	MONTHLY PAYMENT	YOUR 20% COMMISSION
Starter	$10	$2
Basic	$25	$5
Standard	$50	$10
Pro	$100	$20
Premium	$200	$40

Recurring example: One Pro subscriber

One qualifying Pro payment of $100 earns a $20 referral commission. If that subscriber makes six qualifying $100 payments over time, the total is $120 in commissions. The customer must make each qualifying payment for the corresponding commission to arise.

When a customer changes plans

The referral amount changes with the actual eligible subscription payment. A subscriber upgrading from Basic ($25) to Pro ($100), for example, would generate a $20 commission on a qualifying $100 payment rather than $5 on a $25 payment.

EARNING EXAMPLES

What larger referrals could earn

These examples show the maths for completed qualifying subscription payments. They are not income promises.

ACTIVE PAID REFERRALS	PLAN	COMMISSION / PAID CYCLE
10 subscribers	Basic ($25)	$50
25 subscribers	Standard ($50)	$250
50 subscribers	Pro ($100)	$1,000
100 subscribers	Premium ($200)	$4,000

Example: 50 paying subscribers on Pro

50 subscribers × $100 monthly subscription = $5,000 in qualifying subscription payments. At 20%, the community manager earns $1,000 for that payment cycle.

What changes the total?

The actual amount depends on the number of paying referrals, their chosen plans, successful renewals, discounts, complimentary months, reversals and the referral program rules. A user who does not renew does not create a new recurring commission.

EARNING EXAMPLES

A realistic mixed-plan example

Most community managers will refer people who choose different plans. Here is how to calculate a mixed group.

PLAN	PAYING REFERRALS	COMMISSION EACH	TOTAL
Starter	5	$2	$10
Basic	15	$5	$75
Standard	15	$10	$150
Pro	10	$20	$200
Premium	5	$40	$200
TOTAL	50	-	$635

What the example means

If all 50 customers make the qualifying payments shown above in the same cycle, the manager's combined referral commission is $635. If the same qualifying payments happened 12 times, the mathematical total would be $7,620. Actual subscriber retention and payments will vary.

Renewals make a difference

For instance, 50 Pro subscribers would generate $1,000 from one full qualifying payment cycle. If only 35 make the next eligible $100 payment, the next commission total becomes $700. If only 20 pay in the following cycle, it becomes $400.

ONBOARDING PLAYBOOK

How to bring in a new subscriber

Use this sequence whenever someone expresses interest.

01 Start with one question

Ask whether the person has used cryptocurrency or sports prediction markets before. Adjust your explanation to their experience.

02 Explain TitanArb in simple words

Use the one-minute explanation. Focus on price differences and the automated trading process.

03 Share the official information

Send the corporate or beginner brochure and direct them to titanarb.com.

04 Send your unique referral link

Ask the person to use your official referral URL for waitlist or registration, following the current access procedure.

05 Help them explore the trial

Point out the three-day introductory trial and the platform areas they can view.

06 Show the plan table

Help them understand the difference between the monthly subscription fee and trading capital.

ONBOARDING PLAYBOOK

From registration to first trade

Once a person has decided to subscribe, guide them through the official account experience.

07 Complete official registration

The user creates their own account and completes any necessary access or identity checks.

08 Deposit capital through TitanArb

The customer follows the official deposit flow and waits for the balance to be credited in their TitanArb dashboard.

09 Configure account settings

The customer selects an available trading mode and sets permitted capital limits.

10 Open the dashboard together

Show where to see balances, active trading and withdrawal options.

11 Confirm they can find support

Show the official support channels and help pages for future questions.

12 Check in after onboarding

Ask whether the account setup is complete and whether they understand where to see activity and renewals.

READY-TO-SEND MESSAGES

Short messages that work

Adapt these examples to the person you are speaking with. Keep your own wording natural.

First introduction

“Hi! Have you heard of TitanArb? It’s a platform that automatically looks for price differences across decentralized sports markets and attempts qualifying trades. You don’t have to monitor every match yourself. I can send you a simple guide if you’d like to see how it works.”

When someone says “I know nothing about arbitrage”

“No problem. Think of it like finding a price difference between two markets. TitanArb’s technology searches for those differences and checks whether they can be traded. You can start by reading a short beginner’s guide and exploring the three-day trial.”

Sending your referral link

“Here’s my TitanArb referral link: [YOUR OFFICIAL REFERRAL LINK]. Open it to follow the current registration or waitlist steps. Once you’re inside, I can show you the dashboard and explain the subscription plans.”

READY-TO-SEND MESSAGES

Follow-ups and group posts

Focus on helpful conversations, not pressure.

A polite follow-up

“Hi, just checking whether you had a chance to look through the TitanArb guide. If anything is unclear, I can explain the plans, the trial or how account setup works.”

Message for a Telegram or WhatsApp community

“TitanArb is an automated sports arbitrage platform focused on decentralized prediction markets. Members can choose a subscription plan, allocate trading capital and track activity in their dashboard. There’s a three-day introductory trial. Learn more at titanarb.com.”

When someone is ready to join

“Great. Open the official TitanArb link I shared and complete the registration or waitlist process. Once access is available, start with the trial and review the plan options. All deposits and account actions happen through your own TitanArb dashboard.”

COMMON CONVERSATIONS

Simple answers to difficult questions

Use these clear answers when a prospective subscriber asks for details.

Do I need to predict who wins?

No. TitanArb looks for matching price differences between supported markets instead of asking subscribers to pick winners themselves.

Does TitanArb hold my trading funds?

Yes. TitanArb is custodial. Customers deposit trading capital into the platform and manage their account through the official dashboard.

Is the subscription fee my trading money?

No. The subscription is the access fee. Trading capital is a separate deposit and follows the selected plan's range.

Where can I see what happened?

The public Live Execution Feed shows platform trading activity.

Can I use the free trial?

Eligible new users have a three-day introductory trial. The website shows the current trial access and conditions.

Does the company exist legally?

TitanArb LLC was formed in Wyoming in May 2026. Its corporate registration can be checked through the Wyoming Secretary of State. State company registration is not a trading licence.

COMMON CONVERSATIONS

Plans, results and renewals

These are especially useful when someone is deciding whether to subscribe.

Can anyone promise me a monthly profit?

No fixed profit is promised. Results depend on available opportunities, execution and settlement.

What does Subscription Protection mean?

For eligible first-month subscribers, a qualifying net result below the subscription fee can trigger a complimentary next subscription month under the published terms. It is not a refund of trading capital.

Can I withdraw my funds?

Customers request withdrawals through the official TitanArb account process, under the platform's applicable withdrawal terms.

How much can a community manager earn?

The referral program pays 20% of qualifying subscription payments by directly referred subscribers, including eligible paid renewals.

What if my referral cancels?

If there is no eligible new subscription payment, there is no corresponding recurring commission for that period.

Are all markets always available?

Market availability depends on current integrations, event coverage, liquidity and eligible jurisdictions.

PROFESSIONAL STANDARDS

How our managers represent TitanArb

Good community management is built on accurate information, clear expectations and dependable follow-up.

Use these approaches

- Use the official TitanArb name, logo, website and current company materials.
- Explain the product, pricing and custodial funding model in plain English.
- Share only genuine execution records when discussing performance.
- Let customers create their own accounts and make their own subscription choices.
- Route deposits, withdrawals, KYC and support issues through approved company channels.
- Record questions you cannot answer and send them to the appropriate TitanArb team.

Boundaries that protect the community

- No guaranteed-profit statements, fabricated results or claims of risk-free trading.
- No requests for customers' passwords, recovery phrases or security codes.
- No collection of subscriptions or trading deposits into a manager's personal wallet or bank account.
- No descriptions of Wyoming company registration as a financial trading licence.
- No promise of salaries, commission payout dates or special rewards that have not been announced by TitanArb.

PRACTICAL GROWTH

A simple weekly community routine

Consistency matters more than sending the same message to hundreds of people.

DAY	COMMUNITY MANAGER ACTIVITY
Monday	Share a clear introduction explaining TitanArb in one minute.
Tuesday	Explain one concept, such as subscription fee vs trading capital.
Wednesday	Show how to find the Live Execution Feed.
Thursday	Share an onboarding walkthrough and answer common questions.
Friday	Explain the three-day free trial and current subscription plans.
Weekend	Follow up with interested people and help existing referrals find support.

Where to find interested people

Community managers can engage in relevant crypto groups, Telegram communities, X discussions, educational chats and personal networks, following the rules of each community. Educational conversations work better than repetitive unsolicited messages.

Measure helpful outcomes

Track meaningful conversations, official referral-link clicks, completed sign-ups, trial participation, qualifying paid subscriptions and successful renewals. Keep customer information private.

DAILY OPERATIONS

Track, support and improve

A simple routine helps community managers build a reliable subscriber community.

Your daily checklist

- Share an official TitanArb educational message.
- Respond to new questions using accurate product information.
- Follow up with interested people who invited a reply.
- Help approved subscribers find the trial, plan table and dashboard.
- Check the referral dashboard for eligible subscription activity.
- Escalate account, funding, withdrawal or technical issues to official support.

Problems to hand over to support

ISSUE	WHERE IT GOES
Deposit not credited	Official account and funding support.
Withdrawal status	Official account and withdrawal support.
Referral not attributed	Referral support for tracking review.
Subscription or billing problem	Subscription/billing support.
Security concern or suspicious message	Security/support escalation immediately.

Keep only basic, consented contact notes for follow-up. No passwords, account credentials or identity documents in a personal lead sheet.

QUICK REFERENCE

TitanArb at a glance

A one-page review before speaking with a new community member.

KEY FACT	THE SIMPLE ANSWER
What TitanArb does	Searches for qualifying price differences across decentralized sports prediction markets.
How it works	Scan, find, check, execute, settle and record.
Custody	TitanArb holds and manages deposited trading funds.
Subscription	Five plans from $10 to $200 per month.
Trading capital	Published plan ranges from $10 up to $10,000.
Introductory trial	Three days for eligible new users.
Subscription Protection	Possible complimentary next month under qualifying first-30-day terms.
Referral commission	20% of eligible subscription payments and qualifying paid renewals.
Where to register	titanarb.com through the current access / waitlist process.
Where to track	Dashboard, Live Execution Feed and referral dashboard.

Your role makes the difference

A great TitanArb community manager makes a complicated topic easy to understand, supports informed decisions and helps members find their way around the platform.

FINAL MESSAGE

Build knowledge. Build trust.

Every good introduction starts with a clear explanation and ends with a customer who knows where to find the facts.

THE TITANARB COMMUNITY MANAGER PROMISE

We introduce TitanArb accurately, explain the difference between subscriptions and trading capital, guide members through the official platform and support them with patience and professionalism.

Ready to begin?

01 Know the platform

Read the handbook and familiarise yourself with the website.

02 Get your referral link

Use your unique official TitanArb link for new introductions.

03 Start conversations

Explain TitanArb simply, share the guide and answer questions.

04 Help users onboard

Guide them from access and trial to plans, deposits and dashboard navigation.

05 Follow recurring rewards

Monitor qualifying paid subscriptions and renewals in the referral dashboard.

TITANARB - Find the Edge. Execute Faster.
